In addition to this report, volumes covering the markets in Europe and the Americas are also available, with multiple purchase discounts. **All reports in the series follow the same format** and details are provided on the order form overleaf.

The radcure markets in Asia-Pacific are analysed in terms of raw materials, formulated products and end-use applications, with market estimates for 2001 and forecasts for 2006.

Raw materials are discussed for both free-radical and cationic systems, in terms of photoinitiators (including benzophenones, alpha-cleaving, acetophenones, thioxanthenes and cationics), monomers, oligomers, vinyl ethers and epoxides.

Estimates for both acrylic and non-acrylic systems are included, together with market sizes for unsaturated polyester/styrene systems used for wood coatings.

Countries/regions covered:

- **Far East**
(China, Japan, South Korea, Taiwan)
- **South East Asia**
(Indonesia, Malaysia, Philippines, Singapore, Thailand, Vietnam, Others)
- **Indian Sub-continent**
(India, Others)
- **Oceania** (Australia, Others)

End-use sectors are discussed in terms of:

- **Graphic Arts** (printing inks, plates & overprint lacquers)
- **Industrial Coatings** (wood, plastic, metal & others)
- **Opto-electronics** (optical fibres, photoresists for LCD, semiconductor and printed circuit board manufacturing)
- **Adhesives** (structural, laminated & PSA)

Other applications mentioned include silicone release papers and stereolithography.
