IRL is pleased to present in-depth analysis of the top global markets for marine and protective coatings, covering **market shares and prices** in our analysis for the first time.

**All data in this report (historical trends and forecasts, prices, market shares and segmentations) are now available in our unique online database that clients can subscribe to.**

Please contact IRL for more details.

Building on our successful Overview of the Global Marine and Protective Coatings market, which was released in 2008, and our innovative country-by-country database of coatings market data, IRL is offering a detailed and comprehensive guide to these two interesting market sectors of the coatings industry.

The reports provide, for each key country covered (22 countries in total for marine coatings, and 21 countries for protective coatings), consumption estimates in both volume and value terms for marine and protective coatings, with 2014 as the base year and forecasts to 2019. In our two-tiered approach, top-level data is also available for the remaining countries covered in our global database (~100 countries).
IRL has identified the 70 leading companies in the following major country markets, providing market shares in metric tonnes for 2014 in each country. The geographic coverage includes the following countries: Germany, United Kingdom, Spain, Italy, France, Greece (marine only), Poland, Russia, Saudi Arabia, UAE, South Africa, Turkey, China, Japan, South Korea, India, Indonesia, USA, Canada, Mexico, Brazil and Argentina.

The information in the reports is based on a comprehensive programme of telephone interviews with key players in each country market, backed up by thorough secondary research and IRL’s in-house database of global paints and coatings market data.

For each in-depth country report, for both marine and protective coatings, the following market analysis is provided:

- Market Volumes (Tonnes) & Values (£)
- Market Sizes and Values by Resin Type (Epoxy, Polyurethane, Vinyl/Styrene/VAE, Pure Acrylic, Polyester, Alkyd, Nitrocellulose, Others)
- Market Sizes and Values by Application System (Water-based and Solvent-based)
- Market Shares by Volume (tonnes sold) of Leading Players
- Market by End-Use Application:
All research was undertaken between April and July 2015 from our offices in London, New Jersey, New Delhi and Beijing. The research took the form of an extensive telephone interview programme with senior executives at major coatings companies in each of the countries covered.

The information provided has been cross-checked and validated using other online information, published statistical data and trade association data.

Country reports are priced individually, and will be available to purchase online at our website:

www.informationresearch.co.uk

- The Global Marine and Protective Coatings Reports are also available as part of IRL’s Global online database system called Enterprise, which will from now on form a key part of its services to the paints and coatings industry and its affiliates.
- IRL’s database provides a comprehensive and fast tool that enables clients to analyse all data available efficiently and to every desirable level of detail.
- Trends, forecasts, values, market shares and technical segmentations are available in an online pivot table format.
- Users can create data tables to their own designs and needs and compare data across different regions and countries.
